

The water base self-sealer for open grain woods

YO-30C851

A beautiful top coat
or self-sealer
for all woodwork,
with exceptional durability

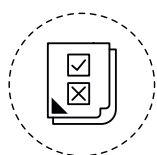

Capture the beauty

Thanks to its quick drying time and its insulating power, this premium formulated self-sealer is designed to preserve your open grain woodwork.

• High durability

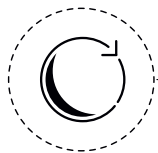

• Mono component or catalyzed

• No VOC emissions

• Good insulating properties if catalyzed, thus recommended to coat rich in tannin woods

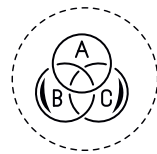

• Rapid drying

• Applicable over natural woods or over any water-based stain

• Good sanding

• Available in different sheens

• Good clarity

• High quality custom or production finishing

• Good chemical-physical resistances

• Equipment can be cleaned with water
